

## QUALITY POLICY

At CYPET Technologies we design, develop, produce and install single-stage bottle production machines. These machines are known as Single Stage ISBM (Injection Stretch Blow Molding).

At CYPET Technologies we are committed to providing our customers with products and services consistently that meet their requirements and legislation.

We monitor the developments in the economic environment and the competition in the plastics machinery industry and we are determined through proper monitoring and control to face and overcome any challenges.

Within these frameworks we apply the CYS EN ISO 9001:2015 standard.

At CYPET Technologies we believe in continuous improvement and are committed to the following goals:

- The implementation and continuous improvement of the effectiveness of the Quality System CYS EN ISO 9001:2015.
- Finding the necessary resources for the continuous verification of the System, its maintenance and update.
- The recognition of educational needs and the continuous training of the staff, in order to ensure a high level of expertise.
- In the establishment of indicators and to set measurable goals on an annual basis which are reviewed and approved by management at least once a year.
- The standardization and traceability of products.
- The harmonic involvement of human resources and technology.
- The satisfaction of our customers and beyond expectations.
- Maintaining competitiveness.

The adoption of a quality management system is a decision of strategic importance for the company, because through it, it is aimed at the continuous improvement of performance.

Our goal as a company is to meet the expectations of our customers in relation to the quality of our products.
